

SUNIL SARVAIYA

Angular Developer

sarvaiyasunil01@gmail.com | [+91 93270 00837](tel:+919327000837) | Ahmedabad, Gujarat | linkedin.com/in/sunil-sarvaiya/

PROFESSIONAL SUMMARY

Angular Developer with 3+ years of hands-on experience building scalable, responsive web applications for SaaS and compliance platforms. Proficient in Angular, TypeScript, RxJS, SCSS, and modern UI libraries (PrimeNG, DevExtreme, Bootstrap, TailwindCSS). Proven track record of developing reusable component libraries, integrating REST APIs, optimizing application performance, and implementing end-to-end & unit testing with Playwright and Jest.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, SCSS, JavaScript, TypeScript, Angular, RxJS

UI Libraries: PrimeNG, DevExtreme, Bootstrap, PrimeFlex, TailwindCSS

Testing: Playwright (E2E), Jest (Unit Tests)

Tools: GitHub, Bitbucket, VS Code, SonarQube, Postman, Jira

Currently Learning: Node.js (Backend)

PROFESSIONAL EXPERIENCE

Angular Developer – Envisage Infotech, Ahmedabad

May 2023 – Present

- Built and maintained multiple Angular-based SaaS and compliance platforms with responsive, cross-browser compatible UI.
- Developed reusable UI component libraries using PrimeNG, DevExtreme, Bootstrap, and PrimeFlex — reducing development time across projects.
- Integrated REST APIs for data grids, filters, and server-side export features across multiple modules.
- Improved application performance using Angular best practices: trackBy, dynamic dialog imports, and component-level caching.
- Resolved memory leaks, SonarQube code quality issues, and critical bugs to enhance application stability.
- Wrote Playwright end-to-end tests and Jest unit tests to maintain code quality and prevent regressions.

Front-End Intern – Cybercom Creation, Ahmedabad

Feb 2023 – Apr 2023

- Built a fully functional e-commerce website using HTML, CSS, JavaScript, and Angular.
- Designed responsive UI layouts and integrated company-provided REST APIs for product listing and cart functionality.
- Gained hands-on experience with Angular component architecture and data binding.

PROJECTS

Techtose — Company Website

- Designed and developed a cross-device compatible company website using Angular and Bootstrap.
- Integrated Cloudinary for cloud image management and Slick Slider for smooth content transitions.
- Developed a dynamic case study showcase to highlight company services and achievements.

Carbon Block — SaaS Web App

- Contributed to the Carbon Block SaaS platform by implementing new features using Angular, PrimeNG, and PrimeFlex.
- Built reusable UI components to maintain consistency across the platform and speed up future development.

ACA Compliance Alpha

- Developed grid filtering and server-side export features using Angular and DevExtreme.
- Wrote comprehensive Playwright E2E tests and Jest unit tests to ensure feature reliability.

- Fixed multiple bugs that improved overall application stability and user experience.

SafetyCube — Aviation Safety & Compliance Platform

- Developed features across Cube, Portal, and Admin modules for an airline/airport safety management platform.
- Implemented table sorting, filtering, and export functionality used by operational teams.
- Optimized performance via caching, trackBy directives, and dynamic dialog imports — reducing unnecessary re-renders.
- Resolved memory leaks and SonarQube issues, improving long-term code maintainability.

Easy Compliance — Compliance Management Platform

- Implemented new UI features and improved existing functionalities using Angular and the Solidrange shared library.
- Ensured consistent UI/UX across all modules and resolved bugs to improve performance and stability.

Vapi Call Assistant — AI-Powered Interview Scheduler

- Built an AI call assistant using Vapi that automatically contacts candidates and conducts screening — collecting name, experience, applied technology, years of experience, and preferred interview time.
- Designed an n8n workflow to process candidate responses and schedule interviews based on their preferred time slot, with fallback logic to request an alternative if the slot is unavailable.
- Automated post-scheduling actions: created Google Calendar events, stored candidate details in an Excel sheet, and sent confirmation emails with Google Meet links.

EDUCATION

Higher Secondary (12th), Science – GSHSEB

2018 – 2019

Percentage: 68.46%

Bachelor of Engineering (Computer Engineering) – Gujarat Technological University

2019 – 2023

CPI: 7.48 / 10
